

## We have the solution for the large & heavy rolls industry

The needs of the large and heavy rolls industry continue to evolve. Always one step ahead, Wulftec continues to provide innovative solutions to meet new challenges... at highly competitive prices. We know that your industry has very specific needs, in terms of durability, dependability and flexibility.

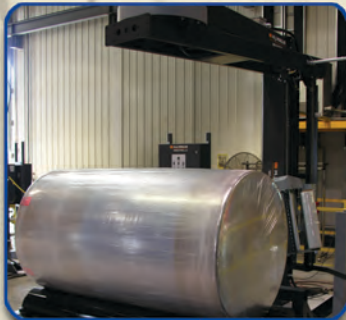

### Stretch film is one of the most economical and reliable packaging materials

- Offers protection from water ingress, dirt and abrasion
- Ensures integrity of the load
- Highly flexible to wrap a multitude of shapes
- Available in different film gauges, characteristics, lengths and colors
- Exceptional puncture resistance
- Stretch film can be recycled

**Productivity and cost effectiveness go a long way with a Wulftec® stretch wrapping solution.**

**Speed up your production line and get to the market faster with a competitive edge wrapping solution.**

### Large & heavy rolls industries:

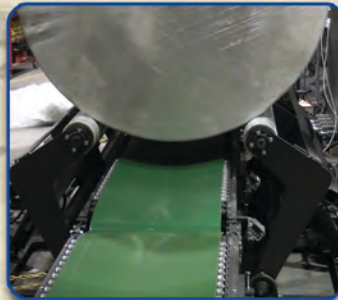

- Paper
- Printing
- Fabric
- Steel

## How can we help you?

### Our solution for large & heavy rolls:

Wulftec offers a complete line of semi-automatic and automatic stretch wrapping systems made to measure and meet the specific needs of our customers. Whether or not you're in the market for new equipment, it's always a good time to plan for success.

### Cradle system (automatics)

Pneumatic or hydraulic cradle integrated with process conveyor to deliver the load to the wrapper, then lift load and rotate while wrapping

### Table & kicker (semi-automatics)

An optional surrounding table will add safety and stability. The table levels the unloading area with the cradle's rollers, preventing the load from falling off the machine, injuring people and damaging the load.

In pit mounted applications, the load will remain at floor level for easy access.

The pneumatic load kicker will give the little boost needed to get a heavy load off the cradle.
