

Are you stretch wrapping in the toughest environment? We have the solution for you!

Our stretch wrappers are built to last in the harshest of environments

- Best warranties in the industry
- 10 year warranty on 25" ring gear bearings
- Lifetime warranty on pre-stretch rollers' blue compound
- Heavy duty structural steel construction (no plastic)

Stretch film is one of the most economical and reliable packaging materials

- Offers protection from water ingress, dirt and abrasion
- Ensures integrity of the load
- Highly flexible to wrap a multitude of shapes
- Available in different film gauges, characteristics, lengths and colors
- Exceptional puncture resistance
- Stretch film can be recycled

Productivity and cost effectiveness go a long way with a Wulftec® stretch wrapping solution.

Speed up your production line and get to the market faster with a competitive edge wrapping solution.

Targeted industries:

- Food, beverage & deep freeze products
- Chemicals & pharmaceuticals
- Corrosive products
- And more...

How can we help you?

Temperature Package

Whether you are wrapping in a freezer or a foundry, in Alaska or Arizona, we will equip your stretch wrapper with a heating or cooling system that will optimize its efficiency. Wherever its location, you will always get 100% out of your stretch wrapper and film.

Washdown Applications

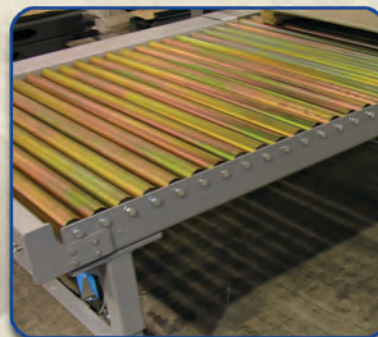

Some industries such as food, beverage and pharmaceuticals require high-pressure cleaning to remove any unwanted contaminants from their facilities. To resist intense clean-ups, Wulftec will equip your system with water proof motors. Quick connectors and enclosure already being rated NEMA 4, this is the last piece that needs to be upgraded to have a waterproof system.

Corrosion Resistant

Wulftec offers different types of paint that are water and corrosion resistant, such as epoxy paint or "Steel-It" paint. Epoxy is the first level of hard-wearing paint resisting repeated washdowns and corrosion.

If you are looking for more protection, the "Steel-It" paint is weather, abrasion and corrosion resistant. It is ideal for applications using ultraviolet rays, chemicals, oils, alkalis, food acid, abrasion and high-pressure washdowns. USDA approved.

For the ultimate corrosion protection, you can have different components zinc coated or replaced with stainless steel.
