

Ideal for the Produce and Fresh food Industry

Other Industries include:

- Dehydrated pet food
- Dairy products
- Deep freeze products (ice cream, poultry, meat)
- Seeds, flowers and plants

Our stretch wrappers are built to last in the harshest of environments.

- Best warranties in the industry
- 10 year warranty on 25" ring gear bearings
- Lifetime warranty on pre-stretch rollers' blue compound
- Heavy duty structural steel construction (no plastic)
- UL508A approved control panel
- Superior electrical / electronic design including Allen Bradley Micrologix PLC and AC drives
- Easily available non-proprietary parts

How can we help you?

Reasons to utilize roping on your palletized products:

Condensation: Roping allows condensation to leave the pallet, consequently protecting your packaged merchandise and other packaging items (labels, printed display cartons).

Cooling: Roping allows palletized products to cool evenly. Reduce cooling costs!

Spoilage: Fully "wrapped" pallets block air circulation and prevent moisture from escaping, thus increasing the likelihood of spoilage.

Waste Reduction: Roping actually uses less material than standard film web and other unitizing products.

Labor Savings: Up to 50% reduction in wrap time adds up to increased labor savings!

Traditional Stretch Film: Roped stretch film can replace other costly methods of unitization.

Options Available:

Specially designed 20" or 30" Film Carriage takes a full web of film and gathers the film into a "rope" to provide a tightly wrapped pallet load and maximum air circulation.

Web or Rope width can be adjusted to fit your needs with uniquely designed roping bars and can easily be converted back to full web wrapping for maximum flexibility.
