

# WULFTEC® RETROFIT WRT TO WRTA

## Increase productivity and reduce costs with your existing stretch wrappers

### This can be achieved with a Wulftec® retrofit WRT to WRTA

Retrofit your current rotary arm stretch wrapper, even a competitor's model with this conversion kit. This kit allows for automatic film tail treatment by means of a clamp and cut/wipe arm. The operator will only need to drop the load in the wrap zone and actuate the pull cord. No need to attach and tear the film anymore.

**SAVE \$\$\$**

**...YOU WILL BE SAVING ON TIME AND LABOR**

**The key benefits of the proven Cut and Wipe  
with clamp retrofit system are:**

- Increases productivity by as much as 30%
- Eliminates the need to attach and cut film, saving valuable operator time and money - it also guarantees a tight wrap with no film tail for worry-free handling and transport
- Can be quickly and easily installed on the WRT-100, WRT-150, WRT-175 and WRT-200
- Equipped with start/stop pull cord
- Available at a competitive price – now your clients can benefit from the productivity of a new stretch wrapper without having to pay for one!

**DON'T WAIT, SAVE BIG**
