STRETCH WRAPPERS

INDUSTRIAL AUTOMATION

Introducing the NEW **ACE** Automatic Carriage Exchanger

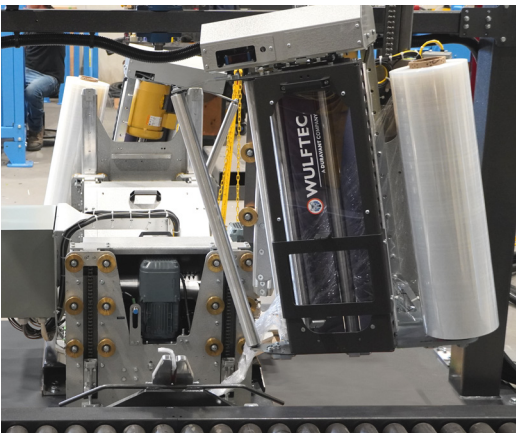

An ACE up your sleeve is always a winning move.
Why not put an ACE on your stretch wrapper?

This option automatically changes the film carriage following roll depletion or a film break, eliminating the need for operator intervention while maintaining continuous production. **ACE** is designed to keep your operation running at peak performance while improving workplace safety and reducing operating costs.

Main features:

- Proven standard film carriage
- Available with up to 6 film carriages
- Can be retrofitted on existing stretch wrapper
- Available with 20" or 30" film carriage
- No film threading required
- Lifetime warranty on pre-stretch rollers
- Can be combined with other carriage enhancement options
- Reduced mechanical wear on the carriage
- Reduced carbon footprint

Available on fully automatic turntable and rotary arm stretch wrappers

IMPROVES OPERATOR SAFETY:

Workers do not need to open safety gates, enter wrapping zones, nor reload film in the wrap zone.

ELIMINATES PRODUCTION DOWNTIME:

The machine automatically cuts, wipes on the film, and swaps in a new film carriage, preventing the entire packaging line from stopping when a roll is empty.

REDUCES LABOR COSTS:

Workers are freed from monitoring film levels and can perform other tasks. They can replace empty film rolls at their convenience while the machine keeps running.

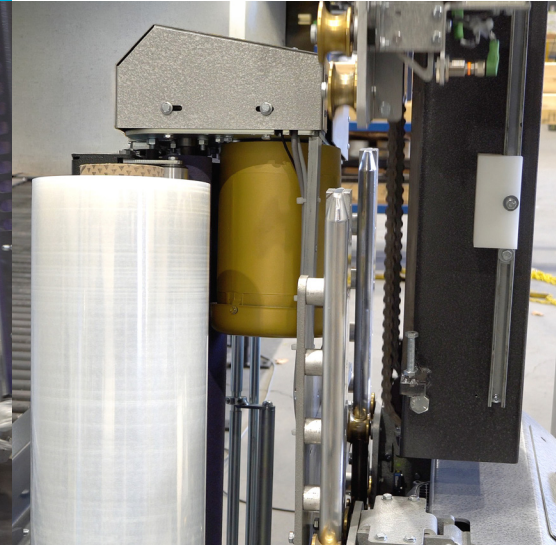

MAXIMIZES THROUGHPUT:

Continuous, uninterrupted wrapping cycles allow high-volume warehouses and distribution centers to hit peak operational efficiency.

ERGONOMICALLY DESIGNED:

Reduce operator fatigue and improve workplace safety.

- ☑ **Smarter automation.**
- ☑ **Unmatched productivity.**
- ☑ **Safer operations.**
